

## DIRECTIONS FOR USE

### **VIS ALPIN ALPINE SALT LOZENGES**

Please read the Directions for Use completely and thoroughly. Please contact your doctor or pharmacist if you need more information or advice.

#### **In which areas do VIS ALPIN alpine salt lozenges help?**

VIS ALPIN alpine salt lozenges help combat inflammation of the throat and pharynx. The special salt and honey combination forms a protective film over the pharyngeal mucosa, thus calming and alleviating throat pain. The salty film formed by sucking on the lozenge creates a barrier against viruses and bacteria, moistens mucous membranes and protects them against dehydration.

#### **Indications for VIS ALPIN alpine salt lozenges:**

- start of a sore throat
- inflammation of the throat and pharynx
- raw throat or coughing fits

#### **What do VIS ALPIN alpine salt lozenges contain?**

VIS ALPIN alpine salt lozenges consist of alpine salt from the Salzkammergut and untreated organic sunflower honey from the Austrian Alpine region.

**Other ingredients:** Sugar, glucose syrup

#### **How should you use VIS ALPIN alpine salt lozenges?**

Always use VIS ALPIN alpine salt lozenges as instructed.

#### **Children and toddlers from the age of 4 years**

Up to 4 lozenges a day

#### **Children from the age of 8 years and adults**

Up to 6 lozenges a day

For optimal effect and to allow the soothing honey fragrance to unfold, you should let VIS ALPIN alpine salt lozenges melt slowly on your tongue.

VIS ALPIN alpine salt lozenges can be taken over a longer period of time, e.g. if your mouth feels dry or your throat is itchy.

#### **What do you have to note when taking VIS ALPIN alpine salt lozenges?**

Do not take VIS ALPIN alpine salt lozenges if you have hypersensitive reactions to the ingredients they contain.

Please contact your doctor or pharmacist if your symptoms do not subside within a week or if they worsen.

We are not aware of any interactions with other products or side-effects when the lozenges are used as intended. There are no findings to indicate that the lozenges should not be taken during pregnancy or lactation.

#### **How should you store VIS ALPIN alpine salt lozenges, and how long can they be used?**

The use-by date is indicated on the external packaging of VIS ALPIN lozenges.

Stop using the medical product once the use-by date has passed.

Keep the product out of the reach of children.

 <sup>25°C</sup> Do not store over 25°C.

### 100% NATURAL ALPINE INGREDIENTS:

#### Alpine salt

Salt has existed within the massive rock formations of the Salzkammergut for 250 million years, protected from any influences of the environment. This has allowed the alpine salt to retain its purity and integrity, which is why it contains extremely important minerals and trace elements.

#### Alpine honey

The local organic honey used in the alpine salt lozenges comes from sunflowers and is subject to highest quality standards. Unblended and untreated, it arrives at our production sites, where it is processed carefully.

### What does VIS ALPIN stand for?

VIS ALPIN uses the healing power of herbs, plants and minerals for natural medicine from our Alps.

#### 100% Alps

We only use plants, herbs and minerals from the Alps to produce VIS ALPIN medical products. Their effect has been confirmed by centuries of use as well as several scientific studies.

#### 100% natural

100% of the herbal active ingredients of agricultural origin used in VIS ALPIN products come from organic cultivation. Furthermore, the products do not contain any auxiliary materials or additives, thus offering natural medicine in its purest form.
